

COMPANY OVERVIEW

Aldom was established in 1975 and is Australian owned with a long history of fabrication, repair, rebuild, upgrade, modification, ruggedisation and assembly of light, medium, and heavy transport and mobile infrastructure. Based in Wingfield, South Australia, Aldom operates from an expansive, 17,000 m2 site with two undercover buildings totaling 5,000 m2, with 2 × 10 tonne OHG cranes.

CAPABILITY

- MIG and TIG welding of Hardox®, mild steel, aluminium and stainless steel.
- Ability to provide Industrial Design services from concept to a deliverable and supportable product.
- Proven ability to take a project from design to a manufactured prototype in a short timeframe.
- Advanced 2D and 3D modelling using AutoDesk CAD and Inventor software, ruggedisation.
- Able to swiftly transition from prototyping to production.
- Ability to paint parts up to 15m (50ft) in length.
- In-house fibre-composite panel facility – used for refrigerated transport and deployable infrastructure (mobile: medical centres, Command & Control, accommodation, catering, energy generation and storage systems, water storage systems)

COMPETITIVE / DISCRIMINATORS

- Diversified across industry sectors and supply chains.
- Purpose built fabrication areas for repair, rebuild, upgrade and modification.
- Problem Solving through in-house engineering design AutoDesk CAD & Inventor.
- Build-to-print and bespoke fabrication and ruggedisation solutions.
- Business stability of 45 years with a proven track record of quality product and service delivered on time.
- In-house heavy vehicle certification to ADR.
