

DEFENCE COATING SYSTEMS

Defence Coating Systems is one of South Australia's leaders in protective coatings. Defence Coating Systems specialise in Protective Coatings, Abrasive Blasting, Chemical Pre-treatment and Powder Coating.

Inglis and Surace Pty Ltd trading as Defence Coating Systems was established in 1996 by Lou Surace. The company has now expanded its factory from 710 square meters to the 2700 square meters it now utilises.

Defence Coating Systems have sophisticated equipment including Wet Spray Paint Booths, two Blasting Systems, Chemical Pre-treatment, Conveyorised Powder Coating System with automatic guns and an online Iron Phosphate pre-treatment.

Defence Coating Systems have the ability to process different dimensions, profiles, substrates and quantities, for a variety of industries including Defence, Mining, and Original Equipment Manufacturers. Defence Coating Systems is the preferred coating specialist for major defence projects that require offsite component painting to MIL-SPECS.

Defence Coating Systems has completed specialised services for the Australian Defence Forces in the world's most hostile environments, and also delicate environments used by Original Equipment Manufacturers in the production of medical, architectural and home appliances.

Defence Coating Systems has an excellent reputation for working in partnership with our Clients to enhance their quality, service, and delivery requirements.

CAPABILITIES/SKILLS/EXPERIENCES

Protective Coatings

Defence Coating Systems is the preferred supplier to the Defence, Mining, Construction, Rail and OEM markets, both in South Australia and Interstate.

Our reputation is built on our ability to work to exact MIL-SPECS, our quality management system and ability to achieve the required outcomes for our clients.

Powder Coating

Defence Coating Systems has more than 20 years' experience in powder coating offering a continuous conveyor line with online iron phosphate pre-treatment system with the ability to process large volumes.

Abrasive Blasting

In 2010 Defence Coating Systems commissioned an abrasive blasting factory. We are able to blast up to six metre lengths and a high volume of small parts through our tumble blaster. We offer a range of abrasive media including ceramic, steel shot, garnet and plastic.

KEY CUSTOMER

- ASC: Air Warfare Destroyer on-site mechanical preparation, blasting and painting.
- BAE Systems: Collins Class Submarine Periscopes, M113AAS4 Armoured Personnel Carrier Components.
- GE Oil & Gas: HPU Generator sets for QCLNG Upstream Project

KEY PARTNERS

- Akzo Nobel International—leading brand of marine and protective coating
- Dulux—pioneer in powder coating industry
- Protec—leading manufacturer of superior coatings
