

## COMPANY PROFILE

### Introduction

Tcorr Inspection is an ISO 9001 accredited inspection body which comprises talented staff with many years of extensive experience in all facets of the coating protection, corrosion and welding industries.

### Vision Statement

Our vision is to offer our clients an independent, professional, timely and value for money inspection service at a competitive market rate.

### Values

Tcorr Inspection is committed to providing a high quality service in accordance with Australian and International Standards.

### Services

Tcorr Inspection offers the following services to a wide range of industries : corrosion engineering, protective coating inspection and QA/QC, cathodic protection and welding and pressure vessel inspections. Our head office is in Adelaide, with a network of inspectors across Australia, enabling us to position ourselves throughout Australia and the Asia Pacific region.

We act as the client's or contractor's representatives for inspection and surveillance of processes of welding, pressure vessel & protective coatings.

- Coating inspection and corrosion consultancy
- Corrosion sample analysis
- Expert witness – coatings, corrosion, specifications
- Inspection of steel structures
- Dilapidation reports – concrete
- Inspection of concrete surfaces
- Inspection of pipe and tank linings
